2 Hour Intensive **Magic Lesson**

My two hour intensive magic lesson is ideal for anybody with a keen interest in magical entertainment. It would also make an exciting birthday present for somebody special who has an interest in magical entertaining.

During the two hour lesson, I give individual tuition on close-up magic. Some of the effects taught during the lesson can also be performed in stand-up or cabaret situations. Please note that all the magical effects demonstrated and explained during the magic lesson are in constant use in my own shows and presentations.

This is not toy shop magic!

Everything has been battle tested over many years in front of tough, live audiences.

Typical lesson content:

Copper and Silver coin effect where the copper coin keeps returning to your hand.

Mental coin effect where you know in advance what coin your audience will choose.

Teaching you how to stack the deck will enable you to know the position of any card in a deck of cards.

Publicity stunt using the 'Ghost Count' to produce your business card.

Rope escape and penetration.

Gambling and escape routines with a loop of chain.

Miser's dream with a coin cup.

Bar stunts which will make you the life and soul of the party.

As an added bonus, all the materials used during the lesson become the property of the student to take home and practice with at the end of the lesson. This two hour lesson could start somebody off on a lifetime hobby of fun and excitement.
