How to be a Ventriloquist

During this intensive two hour lesson, I will teach you how, with a bit of practice, you can learn to be a ventriloquist.

The price of the lesson includes the following items which are yours to keep and take away to enjoy and use at the end of the lesson:

- A wide mouthed puppet which is ideal to use for ventriloquism •
- A drawstring nylon puppet bag to transport the puppet and keep it clean •
- A comprehensive training manual on how to be a ventriloquist •
 - Two 'Ventrilo' aids which will help you to practice •

The picture above shows a typical take home pack for the ventriloquism lesson. The puppet may differ from the one in the picture as my supplier cannot always get the same puppet.

My intensive two hour lesson would make an ideal gift for somebody special. It would also be an interesting and unusual way for your staff, in a team building situation, or for a group of friends to let their hair down and have some fun, while also learning a new skill.

When a group of people take one of my lessons, it makes a great photo opportunity for a publicity picture. Just imagine a picture of twenty or more people all with a puppet on their arm in your local paper or your company publication.

All of my lessons are covered by £10,000,000 public liability insurance.
